EMPLOYMENT

Consultant(Workday)	Appirio a Wipro Company	November, 2014 to Present
----------------------------	--------------------------------	----------------------------------

I am working as a Workday Consultant and have hands on experience on Workday Integration, Workday Data Conversion (Payroll), Workday Integration QA, HCM functional areas.

Technical Skills: Workday

Workday Projects:

Polycom

About: Polycom is an American mulita national Corporation that develops video, voice, and content collaboration and communication Technology .Employees about 3800 Employees.

Role: Worked as an Integration Developer building various CCBs, Benefit Connector. Provided the Support for the integrations built by the Client as well

Trueblue

About: Trueblue is an American Employment agency Company. Implementation between their Leaning management system and Workday through Integrations.

Role: Worked as an Integration Consultant building 2 studios for the project. Had to work upon the Issues faced after Go live and the new Requirement for the same.

SCB

About: Siam Commercial Bank is the first bank of Thailand and is a universal banking group in Thailand now. Various HCM Data integrations and inbound Compensation Data Implemented during the Projects

Role: Worked as an Integration Consultant building CCW, Report + DT, Report + EIB, Studio Integrations, PICOE. Constantly worked upon the new requirements and challenges during the project.

Ferguson

About: Ferguson is the largest plumbing wholesaler in North America.

Role: Worked as a Data Conversion Consultant(Payroll) where I performed loads for US Federal, State, Local Taxes

Accuride

About: Accuride Corporation is a diversified manufacturer and supplier of Commercial Vehicle components in North America.

Role: Worked as a Data Conversion Consultant(Payroll) where I performed loads for US Federal, State, Local Taxes

Citrix

About: Citrix Systems is an American multinational Software Company that provides server, application, and desktop Virtualization, networking and cloud computing technologies.

Role: Worked as a standalone QA resource in this project and did rigorous QA in the integration areas as EIB, co-connectors. Touched the functional areas of benefits, HCM, payroll and talent. Provided support in Developing Custom Reports,Integration

CEC:

About: Chuck E. Cheese is a chain of American family entertainment centers and restraunts.

Role: Worked as a standalone QA Lead in this project and worked upon the functional and integration testing. In this project, I built up test scripts that were re-used by the client for their UAT. I also played a coordinator in the UAT testing by the client. Touched the functional areas of payments.

Priceline Group:

About: The Priceline Group is an American based provider of travel and related online services to consumers and local partners through six primary brands.

Role: Involved in the complete project cycle right from the requirement gathering, played as a QA in the project and worked on the integration testing areas. Also, provided client with the test scripts to be re-used by them for the UAT.

Additional Works:

Built Workday QA Library to be re-used in QA for all the Workday projects and would be helpful for Workday pre-sales pitching. Also, started QA practice in the Workday area right from the niche stage which is now a budding practice of the company.

TECHNICAL EXPERIENCE

Project

Setting up a Opensatck Environment and analyzing Security threats in (cloud) Openstack Environment

Cloud computing is a network-based environment that focuses on sharing computations or resources. Actually, clouds are Internet-based and it tries to disguise complexity for clients. Cloud is built on the key concept of virtualization. Virtualization separates hardware from software and has benefits of server consolidation and live migration.

In this report, first we set up the cloud management environment using the Openstack (Multi-Node Install). Over this Cloud Environment we try to do launch attack on controller node of the cloud and flood it to know the efficiency of cloud during downtime.

ADDITIONAL EXPERIENCE AND AWARDS

- Awarded as '**UTE Achiever of the Month**' in Appirio in July, 2015 for company-wide highest utilization.
- Awarded as '**Pat on the Back**' in Appirio in November, 2015 for outstanding performance in various projects.
